RESEARCH

- Distances to nearby galaxies and the Hubble constant with three independent distance indicators: Cepheids, the tip of the red giant branch (TRGB), and the J-region asymptotic giant branch (JAGB).
- PI of the CHASE spectral survey, to standardize the JAGB as a distance indicator independent of Cepheids & TRGB.
- Lead organizer of the CosmoVerse Data Challenge: a transparent, community-wide test of how TRGB methods affect H_0, with public data, pipelines, and results, and materials accessible without prior expertise.
